Dear colleagues

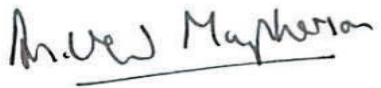

We would like to invite you to the **IBD Symposium** with a top international speaker: **Dr. med. Iris Dotan from Tel Aviv, Israel.**

Dr. med. Iris Dotan will give a state-of-the-art lecture on optimising treatment strategies in the management of inflammatory bowel disease (IBD). The question is how to tailor treatment strategies for patients and ensure an optimal management of Crohn's disease and ulcerative colitis. Better understanding of the stratification of patients according to disease characteristics may help better prognosis, and together with appropriate optimised therapies of conventional and biologic agents can lead to better outcome and should be proposed as a standard of care for the management of IBD. By optimising our treatment strategies, we will have better chances to modify the natural course of IBD.

We are very pleased to welcome Dr. med. Dotan at the IBD Symposium and look forward to your high attendance on **Wednesday May 31th 2017 at the Inselspital** in Bern!

We are looking forward to seeing you!

Best regards

Prof. Dr. med. Andrew Macpherson
